

THE PLAN

There are 15 master photographs in THE NEBULA SERIES, each with its own title. My plan is to once again find financial backers for bringing the Nebula art to the public marketplace - be those backers individual, corporate, gallery-connected, or organizational. The Goal will be a thoroughly-researched business plan to manufacture, promote, sell, and distribute THE NEBULA SERIES. A complete four-stage master plan ~ from formatting, printing, and temporary inventory storage to final shipping ~ is available to seriously interested parties.

We have two sizes of large poster-like prints, the larger of which will be signed and numbered as limited editions for each of the 15 master photographs. Essentially fine lithographs, these are quite IN-expensive to produce, and will be processed, stored, and mailed by the printing firm, in this case an old-line, long-established company that performed the same function for us 25 years ago.

It is the same for our NEBULA SETS. We initially have TWO sets of stunningly beautiful 10x12 litho prints, on museum-quality paper, with each print embossed "Collector Edition." Each of the sets features FOUR titles. These have a printed, pencil-like signature and can be additionally embossed if desired. Complete samples sets from 1982 are available for inspection.

The investment is modest. Other than the single limited editions of the 15 master prints, the potential return is ongoing, and quite literally without limit.
